cover photo:  
The court of the "heresy hearing"  
Grand hall of the French Academy of Agriculture

## Table of Contents

The Devil's avocate  
The alchemist and his times  
Frittage chronicle  
First publication: "Anomalous metabolic balance and biological transmutations"  
Grand thesis  
"Carbon monoxide intoxication in the welding factories"  
Successor of wisdom  
"Science and alchemy"  
"Wisdom for liberty"  
"Living things and transmutation"  
Universal wisdom  
"French scientist exploded atomic physics"  
Kervran and Baranger  
"Biological Transmutations"  
"Natural Transmutations"  
Mystery of the photographic evidence  
"Have the living things carried out Grand work?"  
Support from geologists  
Frittage mechanism  
New development  
Biological agriculture  
Lemaire-Boucher method  
Frittage activator  
"Are calves alchemists?"  
"The accelerator effect of magnesium on the increase of phosphorus and calcium in animals"  
Problems of non-zero balance  
"L'imagination au pouvoir?"  
Lost official document  
Heresy hearing  
Problems of lobster experiment  
Personalities of the heresy hearing  
Criticism by New Scientist: "Can the lobster transmute elements?"  
Lobster as alchemist  
Limits of non-zero balance  
Requiem for the cardinal  
"Reflections on the recent communication"  
"A few considerations on the alleged biological transmutations"  
Experiment under suspicion

Problems of the counter-experiment  
Henry Doubleday research association  
Review of biological transmutation  
Malicious research  
Searching philosopher's stone  
(1) Oat cultivation experiment  
(2) Rye grass germination in Evian water  
(3) Lentil germination with neutronic activation  
Oppression of pagans  
"The balances of mineral elements in the germination"  
Ignored theory  
Controversy at "Raison Presente"  
Kervran's counter-argument for "Raison Presente"  
Conflict between Kervran and Guéguen  
About "biological" agriculture  
I.N.R.A. and biological agriculture  
"Are biological transmutations necessary for agriculture?"  
Thirteen critical points in relation to biological agriculture  
End of controversy  
Royalist's memoir  
Transmutation experiment in geology  
Frittage reactions and theoretical physics  
Celestial agriculture  
Research cooperation with Zündel  
Swan song  
Beyond the dark ages  
Creator's thesis  
Revived legend  
Treatise by Dr. Vysotskii  
Never-ending conflict  
Saint's smile  
References

## **Frittage timetable**

1960 July "Anomalous metabolic balance and biological transmutations"  
Dec. "Life is an alchemist" (A. Michel)  
1961 Apr. "Carbon monoxide intoxication in the welding factories"  
1962 Jan. "Science and alchemy" (C. Bergier)  
Apr. "Wisdom for liberty" (L. Powel)  
"Living things and transmutation"  
Oct. "Biological transmutations" (Kervran's first book)  
1963 Jan. "Life bid defiance to the atomic principles" (A. Michel)  
May "Natural transmutations" (Kervran's second book)  
1964 "Low energy transmutations" (Kervran's third book)  
"The evolving rule on the formation of igneous rocks" (B. Choubert quotes Kervran)  
"This unknown earth" quotes Kervran  
Lemaire-Boucher method begins its movement  
1966 "On the discovery of biological transmutations" (Kervran's fourth book)  
Kervran writes introduction to "Save your health" (E. Plisnier)  
1967 Sept "Are calves alchemists?"  
Dec. "The accelerator effect of magnesium on the increase of phosphorus and calcium in animals"  
1968 "Evidence of the existence of biological transmutations" (Kervran's fifth book)  
1969 Jan. Kervran gives lecture series at the French National Institute of Agriculture.  
Kervran presents an experimental report to the French Academy of Agriculture, but the academy refuses publication.  
Sept. "Increase of phosphorus and calcium in animals fed large doses of magnesium"  
1970 Feb. Kervran presents new report to French Academy and enters an intense controversy with the members of the Academy.  
Oct. "A few considerations on the alleged biological transmutations" (L. Guéguen)  
"Biological transmutations in agriculture" (Kervran's sixth book)  
1971 Oct. A critical article is published by G. Gohau in "Raison Presente" No. 20.  
Dec. The experiment by J. E. Zündel is presented to the French Academy of Agriculture.  
1972 Jan. The counter-experiment to transmutations is presented to the French Academy.

Feb. A critical article is presented by L. Guéguen in "La Recherche".  
Apr. A refutation is presented by Kervran in "Raison Presente" No.22.  
May "The opinions concerning what we called biological transmutations" L. Guéguen)  
1973 A refutation is presented by Kervran in the Bulletin of I.N.R.A. No. 74.  
"Evidence of low energy transmutations in physics and geology" (Kervran's seventh book)  
1975 "Evidence of low energy transmutations in biology" (Kervran's eighth book)  
1982 "Biological transmutations and modern physics" (Kervran's ninth book)
